

The Intellitron PS-2215 is a 15-amp switching power supply for portable use for a QRP radio or any equipment requiring up to 15 amps of power at 13.8 volts.

SPECIFICATIONS

Input Voltage: 110V AC

Output Voltage: 13.8V DC / 15.0 Amps

Current Output: 12A / 15A Max

Short Protection: A warning light on the unit will illuminate when a problem is detected

Over Voltage Protection: Warning light activates if output exceeds 16V DC

Cooling: Fan cooling system

Fuse: 230V/3A

Dimensions: 6.3 in x 3.7 in x 2 in

CAUTION

- If the warning light is illuminated, the protection system will activate, and power will be cut off.
Turn off the switch and restart the unit. After one minute, the warning LED should be off.
- Do not use incorrect fuse values; replace only with the specified fuse (230V/3A required).
- Avoid using the unit to charge batteries.
- Ensure the air convection slits are not blocked to maintain efficient heat dissipation.

TWO YEAR LIMITED WARRANTY

This Limited Product Warranty is provided by the Dealer where your Intellitron product was purchased. The Product Warranty extends only to the original purchaser of the product and is valid for a period of two years from the date of purchase. Please keep your dated sales receipt as evidence of the date of purchase. You will need it to receive warranty service. Your Dealer warrants the product will be free from defects in workmanship and materials under normal use. If the product fails to conform to the warrant and is within the warranty period of two years, contact your original dealer for a return authorization. Your dealer may choose to either repair or replace the non-conforming product.
